NORTHLAKE AUTO RECYCLERS NAMED ARA CAR MEMBER OF THE YEAR

BALTIMORE, MD., October 28, 2016—Northlake Auto Recyclers of Hammond, IN, was named the Automotive Recyclers Association 2016 Certified Auto Recycler (CAR) Member of the Year during the ARA's 73rd annual convention here.

Marty Hollingshead, president of the company, accepted the award on behalf of his company. ARA President Mike Swift noted that "Marty Hollingshead and his team at Northlake exemplify what a Certified Auto Recycler should be.

"Not only is the facility CAR certified but they are part of the less than one percent of the Gold Level facilities in the Indiana Department of Environmental Management's Clean Yard Program. Marty sets a very high standard and is supported by his team, who take pride in their facility - one that our industry can be very proud of," said Swift.

Northlake is setting an amazing example for Recyclers devoted to 'doing it right'. The Indiana Certified Automotive Recycler Exemplary Standards Program ranks Northlake Auto Recyclers at the top in their recent audit exceeding all benchmarks at 104%, remarked Sara Hamidovic of VET Environmental Engineering who manages the state INCARES certification program for the Automotive Recyclers of Indiana.

NAR operates from a 60,000 square foot warehouse and indoor parts storage facility, plus 80,000 square foot covered outside parts storage, all professionally organized in a private 18-acre yard.

Northlake processes approximately 1,800 vehicles annually to meet the needs of our customers. Our large inventory of quality recycled parts for late-model cars, SUVs, and light trucks includes

- Superior quality recycled parts
- Engines
- Transmissions
- Axles
- Wheels
- Collision Parts
- Selected aftermarket and new OEM parts
